

EDUCATION

Dev Bootcamp

Full Stack Development track

DePaul University

BA International Studies

SUMMARY

Hi, I'm **Pete**. I'm a full-stack web developer looking to contribute to a growing software development team. I am passionate about new technologies and building products the right way. I obsess over modular code, efficient solutions, and good coffee.

SKILLS

DEVELOPMENT: Ruby, Javascript, jQuery, Ruby on Rails, SQL, Active Record, HTML5, CSS3, Semantic UI, Materialize

TESTING: Rspec, Capybara, Jasmine

FRAMEWORK: Rails

REPOSITORIES: git, Heroku

EMPLOYMENT

DEV BOOTCAMP

Jr. Web Application Developer

Chicago, IL
2015 to Current

- Junior developer able to build web applications from the ground up
- Built fully functional web apps using Ruby, Ruby on Rails, Javascript, jQuery, Ajax, HTML5, CSS3, Semantic UI
- Concentration on algorithmic thinking, object oriented programming, agile & test-driven development
- Involved in full project development process from conception to implementation
- Heavy pair programming experience
- Fully immersed learning ranging in 10-13 hour days
- Helped junior developers understand new concepts and keep clean code
- Familiar with testing tools such as Rspec, Jasmine, Capybara

INTERACTIVE BUSINESS SYSTEMS

IT Recruiter

Oak Brook, IL
2014 to 2015

- Responsible for pairing top IT Software Professionals to various open positions calling for Software Developers, Programmers, Project Managers, etc.
- In charge of entire process, from finding and sourcing qualified candidates, to guiding them through the interview process, to securing the candidate an offer of employment
- Secured candidate offer letter within first month of employment

SOFTWARE RESOURCES - WALT DISNEY STAFFING FIRM

IT Recruiter

Orlando, FL
2012 to 2014

- Paired Developers, Project Managers, Systems Engineers, etc. to primarily Walt Disney open positions
- As an Account Manager, unearthed new recruitable positions though building rapport with the hiring managers and facilitating client in-take meetings
- Extensive recruiting and management experience within all divisions of IT
- Brought in the highest fee for a single candidate in Software Resources' 20 year history (\$46,000)

PROJECTS

DONATION CAT

Dev Bootcamp capstone 8 day final project. The app is designed to gather disparate charities together in one location to enable users to donate item-specific needs to the charity. It imports charity Amazon wishlists in real time, and offers full user & charity login/logout/profile capability. The site was built with Javascript, jQuery, Ruby, Rails, AJAX, Semantic, HTML5, & CSS3.

<http://donation-cat.herokuapp.com/>

WEBSITE/BLOG

My personal site. Features, among other things, a Javascript/HTML5 in-browser game whose canvas resizes dynamically depending on screen size. Javascript, jQuery, AJAX, HTML & CSS.

<http://peterhinnners.github.io>

CATBREAK

A Rails & jQuery project with the idea to incorporate Google AdSense at some point. Allows users to share via Facebook or Twitter an image of their favorite cat. Most challenging part was hacking around Facebook's share functionality, which typically only allows you to share a single image for a given website. Rails, Javascript, jQuery, HTML, CSS.
