EDUCATION

Dev Bootcamp
Full Stack Development track

DePaul University
BA International Studies

SUMMARY

Hi, I'm **Pete**. I'm a full-stack web developer looking to contribute to a growing software development team. I am passionate about new technologies and building products the right way. I obsess over modular code, efficient solutions, and good coffee.

SKILLS

DEVELOPMENT: Ruby, Javascript, jQuery, Ruby on Rails, SQL, Active Record, HTML5, CSS3, Semantic UI, Materialize
TESTING: Rspec, Capybara, Jasmine
FRAMEWORK: Rails
REPOSITORIES: git, Heroku

EMPLOYMENT

DEV BOOTCAMP
Jr. Web Application Developer

Chicago, IL
Feb 2015 to Current

- Junior developer able to build web applications from the ground up
- Built fully functional web apps using Ruby, Ruby on Rails, Javascript, jQuery, Ajax, HTML5, CSS3, Semantic UI
- Concentration on algorithmic thinking, object oriented programming, agile & test-driven development
- Involved in full project development process from conception to implementation
- Heavy pair programming experience
- Fully immersed learning ranging in 10-13 hour days
- Helped junior developers understand new concepts and keep clean code
- Familiar with testing tools such as Rspec, Jasmine, Capybara

INTERACTIVE BUSINESS SYSTEMS
IT Recruiter

Oak Brook, IL
Sep 2014 to Jan 2015

- Responsible for pairing top IT Software Professionals to various open positions calling for Software Developers, Programmers, Project Managers, etc.
- In charge of entire process, from finding and sourcing qualified candidates, to guiding them through the interview process, to securing the candidate an offer of employment
- Extensive recruiting and management experience within all divisions of IT
- Secured candidate offer letter within first month of employment

NORTH AMERICAN SENIOR BENEFITS
Independent Insurance Agent

Chicago, IL
Apr 2014 to Sep 2014

- Prospect, find and interview prospective clients for various state-regulated life insurance programs (Mutual of Omaha, Aetna, Transamerica, etc.)
- Craft presentations as relates to clients' particular needs
- Build rapport, educate and determine the best fit for the client

SOFTWARE RESOURCES - WALT DISNEY PREMIER STAFFING FIRM
IT Recruiter

Orlando, FL
Mar 2012 to Mar 2014

- Paired Developers, Project Managers, Systems Engineers, etc. to primarily Walt Disney open positions
- As an Account Manager, unearthed new recruitable positions though building rapport with the hiring managers and facilitating client in-take meetings
- Brought in the highest fee for a single candidate in Software Resources' 20 year history ($46,000)

PROJECTS

DONATION CAT

I worked on this site for my 8 day final project at DBC. The app is designed to gather disparate charities together in one location to enable users to more easily donate to charities. It imports charities' Amazon wishlists in real time, and offers full user & charity login/logout /profile capability. The site was built with Javascript, jQuery, Ruby, Rails, AJAX, Semantic, HTML5, & CSS3.
http://donation-cat.herokuapp.com/

CATBREAK

A rails & jQuery project with the idea to incorporate Google Adsense at some point. Allows users to share via Facebook or Twitter an image of their favorite cat. Most challenging part was hacking around Facebook's share functionality, which typically only allows you to share a single image for a given website. Rails, Javascript, jQuery, HTML, CSS.
http://catbreak.herokuapp.com/

BLOG

My personal site and first attempt to showcase my work as a developer. Features, among other things, a Javascript/HTML5 in-browser game whose canvas resizes dynamically depending on platform.
