EDUCATION

Dev Bootcamp
Full Stack Development track

DePaul University
BA International Studies

SUMMARY

Hi, I'm Pete. I'm a full stack software engineer and recent green tea convert. I've spent the last 12 months working at one of the top content delivery networks in the world, working on a management and configuration portal that allows clients like Microsoft and Facebook to monitor, configure and check stats for their various sites. I enjoy both front and back-end work, and have mostly used AngularJS and PHP for those roles this past year. We recently relocated back to Chicago, and I'm excited to start scouting out challenging dev roles in the area.

SKILLS

DEVELOPMENT: Javascript, jQuery, Ajax, Angular, PHP, Ruby, MySQL, HTML, CSS
TESTING: Mocha, Chai, Sinon, Protractor
FRAMEWORK: AngularJS, Slim, Rails, Bootstrap
TOOLS:
Sublime Text, IntelliJ, iTerm2, MySQL Workbench, SourceTree (graphical git repository interface), Chrome Developer Tools, Stack Overflow, Google

EMPLOYMENT

HIGHWINDS / STACKPATH
Software Engineer
Winter Park, FL
Mar 2016 to Mar 2017

• Tasked with designing and implementing new features for StrikeTracker, a single page AngularJS application that interfaces with a PHP (Slim) RESTful API, and serves as a portal from which clients manage and configure their CDN options and various sites
• Worked in two week Agile sprint cycles, averaged 10 completed tickets per sprint
• Handled multiple requirements with varying levels of detail, communicating with team lead for additional clarification when necessary
• Also became the de facto point-person for fixing production bugs, many of which involved a complex 3rd party analytics code base
• Wrote unit, functional, and end-to-end tests using Mocha, Chai, Sinon and Protractor

DEV BOOTCAMP
Jr. Web Application Developer
Chicago, IL
Feb 2015 to Aug 2015

• Built fully functional web apps using Ruby, Ruby on Rails, Javascript, jQuery, Ajax, HTML5, CSS3, Semantic UI
• Concentration on algorithmic thinking, object oriented programming, agile & test-driven development
• Involved in full project development process from conception to implementation
• Heavy pair programming experience
• Fully immersed learning ranging in 10-13 hour days

INTERACTIVE BUSINESS SYSTEMS
Technical Recruiter
Oak Brook, IL
2014 to 2015

• Responsible for pairing top IT Software Professionals to various open positions calling for Software Developers, Programmers, & Project Managers
• In charge of entire process, from finding and sourcing qualified candidates, to guiding them through the interview process, to securing the candidate an offer of employment
• Secured candidate offer letter within first month of employment

PROJECTS

PORTFOLIO
http://peterhinners.github.io
Features 3 past projects:
• Google Maps Route Optimizer with interactive map
• Javascript/HTML playable game
• Catbreak.com - Rails site geared toward generating Google Adsense revenue

OTHER

• Speak, read & write fluent Spanish - wife is from Mexico
• Speak, read & write conversational German - lived there 5 months
• Johann Sebastian Bach aficionado - grew up playing classical piano and Bach's preludes, fugues, & inventions
• Also music production, chess, basketball & soccer
